JCM Project Design Document Form

A. Project description

A.1. Title of the JCM project

Project of Introducing High Efficiency Refrigerator to a Food Industry Cold Storage in Indonesia

A.2. General description of project and applied technologies and/or measures

The proposed JCM project aims to save energy by introducing high efficiency refrigerator to a food industry cold storage in Indonesia. The project contributes to reduce 128 tCO_{2e} of greenhouse gas (GHG) emissions annually through installation of a refrigerator in a newly established food industry cold storage of PT Adib Global Food Supplies in West Java Province, Indonesia. The cooling capacity of the refrigerator is 189 kW(*) and the power consumption is 86 kW(*).

The estimated amount of annual electricity consumption by the project refrigerator is 603 MWh, while that by the reference refrigerator is 776 MWh, which is equivalent to 22% of energy saving.

(*):Temperature condition: - 25 deg. C, Cooling water fed to condenser: inlet 32 deg. C

A.3. Location of project, including coordinates

Country	Republic of Indonesia		
Region/State/Province etc.:	West Java Province		
City/Town/Community etc:	Kelurahan Bantargebang, Kecamatan Bantargebang,		
	Bekasi		
Latitude, longitude	6°18'33.9"S, 106°59'02.8"E		

A.4. Name of project participants

The Indonesi	Republic a	of	PT. Adib Global Food Supplies, PT. Mayekawa Indonesia	
Japan			MAYEKAWA MFG. CO., LTD.	

A.5. Duration

Starting date of project operation	25/11/2014
Expected operational lifetime of project	12years

A.6. Contribution from developed countries

The proposed project was partially supported by the Ministry of the Environment, Japan through the financing programme for JCM model projects which provided financial supports up to 50% of initial investment for the projects in order to acquire JCM credits.

As for technology transfer, MAYEKAWA MFG. CO., LTD has conducted OJT training and provided a manual on operation, maintenance and safety measures of the facilities introduced to the project of PT. Adib Global Food Supplies. Maintenance services after project implementation will be provided by PT Mayekawa, which will also contribute to technical transfer through maintenance experiences of the staff of PT. Adib Global Food Supplies.

B. Application of an approved methodology(ies)

B.1. Selection of methodology(ies)

Selected approved methodology No.	ID_AM003
Version number	1.0
Selected approved methodology No.	N/A
Version number	N/A
Selected approved methodology No.	N/A
Version number	N/A

B.2. Explanation of how the project meets eligibility criteria of the approved methodology

Eligibility	Descriptions specified in the	Project information
criteria	methodology	
Criterion 1	The project installs cooling system	The project installs cooling system at a
	at food industry cold storage and	food industry cold storage for the purpose
	frozen food processing plants for	of chilling the food products below -25
	the purpose of chilling the food	deg. C.
	products to below -20 deg. C.	
Criterion 2	The project system is a secondary	The project system is a secondary loop
	loop cooling system using natural	cooling system using natural refrigerant
	refrigerant. CO2 is used as the	(NH3 and CO2). CO2 is used as the
	secondary refrigerant in the system.	secondary refrigerant in the system.
Criterion 3	The refrigerator applied in the	The refrigerator applied in the project
	project cooling system is a two	cooling system is a two stage compressor
	stage compressor refrigerator with a	refrigerator for cold storage with 189kW
	cooling capacity as shown below:	cooling capacity.
	For cold storage: less than 340kW	

	For individual quick freezer: less	
	than 260kW	
Criterion 4	The compressor of the project	The compressor installed in the project
	refrigerator is controlled by	refrigerator is NewTon R-6000, which is
	inverter.	controlled by an inverter.
Criterion 5	COP of the project refrigerator i	The compressor installed in the project
	(COPPJ,i) is shown below:	refrigerator is NewTon R-6000. The COP
	For cold storage: more than 2.0	is 2.20.
	For individual quick freezer: more	
	than 1.5	
Criterion 6	Periodical check at least once a	Periodical check is planned once a year.
	year is planned.	
Criterion 7	Plan for not releasing the primary	Plan for not releasing the primary
	refrigerant used for project	refrigerant used for the project
	refrigerator is prepared. In the case	refrigerator is prepared.
	of replacing the existing	
	refrigerator with the project	
	refrigerator, refrigerant used for the	
	existing refrigerator is not released	
	to the air.	

C. Calculation of emission reductions

C.1. All emission sources and their associated greenhouse gases relevant to the JCM project

Reference emissions		
Emission sources	GHG type	
Electricity consumption by the reference refrigerator	CO2	
Project emissions		
Emission sources GHG		
Electricity consumption by the project refrigerator	CO2	

C.2. Figure of all emission sources and monitoring points relevant to the JCM project

C.3. Estimated emissions reductions in each year

Year	Estimated Ref	erence	Estimated	Project	Estimated Emission
	emissions (tCO _{2e})		Emissions (tCO _{2e})		Reductions (tCO _{2e})
2013		0		0	0
2014		58		45	13
2015		575		447	128
2016		575		447	128
2017		575		447	128
2018		575		447	128
2019		575		447	128
2020		575		447	128
Total		4,083		3,174	909
(tCO _{2e})					

D. Environmental impact assessment		
Legal requirement of environmental impact assessment for	No	
the proposed project		

E. Local stakeholder consultation

E.1. Solicitation of comments from local stakeholders

The project activity is limited to installation of a new high efficient refrigerator in a new cold storage with a limited level of potential social and environmental impact. The PP identified local stakeholders as the local governments: Bekasi Regency Government and West Java Provincial Government as there is no residence within the area where any environmental impact may be caused by the proposed project.

The PP conducted a local stakeholder consultation meeting (face to face meeting) described as below:

[Date] 9:30 – 11:30 8th December 2014

[Venue] Conference room of the West Java Provincial Government

[Agencies participated in the consultation]

No	Organization		
1	International Cooperation Division, Regional Autonomy and Cooperation Bureau,		
	Government of West Java Province		
2	Department of Communications and Information, Government of West Java Province		
3	Social Service Bureau, Government of West Java Province		
4	Regional Environmental Management Board of West Java Province (BPLHD Jawa Barat)		
5	Economic Bureau, Government of West Java Province		
6	Fishery and Marine Department, Government of West Java Province		
7	Agriculture and Food Crops Department, Government of West Java Province		
8	Industry and Trade Department, Government of West Java Province		

For the following agencies which were unable to attend the local stakeholder consultation meeting mentioned above, PP provided the distributed documents in the meeting to these agencies and requested them to provide their comments by email.

- 1) Regional Development Planning Board of West Java Province (BAPPEDA Jawa Barat)
- 2) Regional Environmental Agency of Bekasi Regency (BPLHD Kota Bekasi)

E.2. Summary of comments received and their consideration

Stakeholders	Comments received	Consideration of comments received
International	We welcome the implementation of	No action is needed.
Cooperation	proposed projects under the JCM	
Division,	between Indonesia and Japan.
